NEWS FROM NEW-JERSEY.

PATERSON. OPENING THE HAMILTON CLUB-HOUSE. The Hamilton Club, a new organization and the re-mit of the first attempt in the city to form a club after nodel of the leading ones of New-York, with a ine and exclusive home for the members, opened ouse in Church-st. last evening with a reception. member was allowed to bring in one friend to nspect the rooms. The house is the former Free Public Library Building, which has been remodelle and comfortably fitted. The club started with about 25 members, including a number of well-known Newfork clubmen whose homes are in Paterson. The ame of the organization is a compliment to the memory of Alexander Hamilton, who, with his assocites of the Society for Establishing Useful Manufactres, founded Paterson in 1792.

recent authors' Carnival netted over \$3,500 building fund of the Paterson General Hospital. The Paterson Savings Institution has accepted plans for a new banking house to take the place of the his-toric Congress Hall, Main and Market sts., owned by the bank. The new building will be an imposing six-story structure, and is expected to cost with equip-ments about \$125,000.

NEWARK.

Christopher Hughes, one of the committee sent from the spinners of the three mills of the Clark Thread Company to the executive committee of the National ners at Fall River, returned yesterday. It s been decided to call a special meeting of the Na-nal Association at Boston early this week, when the on of a strike by the Clark spinners will be setthed. The convention will be held probably on Tuesday. If the answer of the Clark Thread Company in reply to the ultimatum of the spinners is not satisfactory, a strike will be ordered in all the three mills at once. These mills employ altogether about 4.000 hands. The principal grievance is on old one relates to the treatment the hands receive from Superintendent Weimsley, of the Keurney mills.

ELIZABETH.

Thomas F. Egan, who rented the privileges to the bookmakers at the New-Jersey Jockey Club and Linden Park tracks, was arrested yesterday at Hoboken on a indictment found by the Union County Grand Jury. He was taken to Elizabeth and Sheriff Hicks held him in \$5,000 bail to appear next Saturday to enter his

In the Union County Court yesterday Richard Hoy, for atrocious assault on his mother-in-law, Margaret Hunt, whom he tried to kill with a butcher's knife, was sentenced to two years in State prison. John Dady, William Peterson, Thomas Fahey and Henry Harriman, who were indicted by the last Grand Jury for playing "penny ante" in Plainfield, were arraigned yesterday before Judge McCormick. They pleaded gullty and were fined \$1 each.

NORTHERN NEW-JERSEY COUNTIES.

ORANGE-The regular meeting of the Historical od Geographical section of the New-England Society of Orange was held last evening. Dr. George Eayles read the paper by Thomas A. Pdison on "Electrical Endosmose," which he presented at the International Medical Congress in Berlin last summer, and gave interesting accounts of the doings of the Congress. James S. Cox, the president of the society, gave a graphic account of his recent trip across the Atlantic by the southern route.

RUTHERFORD.-The old Presbyterian Church building has been turned into a public entertainment place, and will be known as Ivison Hall. The building will be fitted with electric lights. . . Robert R. Leeds has been elected president of the Rutherford Wheelmen to fill the unexpired term of R. A. Burgess, resigned. E. A. Burgess has been elected sergeant and G. Brown secretary. The club now has about forty-five members.

PASSAIC.—The Passaic Wheeling Club, which now has seventy-four active members, has elected the following officers: President, C. J. Challar; vice-president and captain of athletics, F. E. Shuit; secretary and treasurer. Stephen Bell. The colors chosen for the club are cherry and black. . . The Greek Church (formerly Dundee Chapel of the Presbyterian Church), will be dedicated by Bishop Wigger this morning.

OTHER SUBURBAN TOWNS.

WESTCHESTER COUNTY. MT. VERNON.-Coroner Mathews, at Washington-

John Williams, who was alleged to have been killed by a blow struck by Andrew Schmaltz. The inquest was adjourned until Monday. Schmaltz was taken before Justice Collins and committed to jail on a charge of murder. George H. Olphert, John Mont-gomery and Samuel Kennific were committed as wit-nesses.

WHITE PLAINS.—Judge Dykman has granted an absolute divorce to Anna C. Raymond, of New-York city, from her husband, Henry C. Raymond, of Sing Sing. The couple were married on July 4, 1840. Raymond is a stage carpenter, and until recently received a salary of \$35 per week at the Union Square Theatre in New-York.

SING SING.—The congregation of the Presbyterian Church at Sing Sing gave a reception to their pastor, the Rev. Franklin J. Dwight, on Friday evening. He has just returned from a two years' visit to Europe for the benefit of his health.

BEDFORD.—The Rev. J. H. Hoyt has declined the call extended by a church at Fulton, N. Y. He will remain here.

LONG ISLAND. LIFE-SAVING MEN SHOOT A WHALE.

The carcass of a whale measuring forty feet in length is on exhibition at Bridgehampton. It was captured on Friday afternoon by the crew of the Georgia Life Saving Station midway between Bridge-hampton and Easthampton. The whale was first seen spouting a short distance from the shore. The lifesaving men, who were not experienced whalemen, launched a common fish dory and started in pursuit of the whale. As soon as the dory got within sho of the whale. As soon as the dory got within shooting range one of the men in the boat, who was armed with a gun, empiled a heavy load of shot into the right side of the whale. This proved to be a vital spot and the big whale, after lashing about in the sea for a few minutes, became motionless and was found to have died from the wound. The life-saving men proudly towed the whale ashore at Bridgehampton, where it has been viewed by a large number of persons. The carcass is said to be worth \$1.000. It will be towed to some fat-boiling establishment, where it will be utilized for oil and whalebone.

STATEN ISLAND. RICHMOND .- Captain Charles Dietz, of the tugboat William H. Vanderbilt, who was jointly indicted with a number of his crew for robbery on complaint of Patrick Brady, of Bergen Point, pleaded guilty yesterday to grand larceny in the second degree in the Richmond County Court of Sessions. Judge Stephens suspended sentence. James Fitzgerald, the engineer, was also discharged on the ground of insufficient evidence. . . . Frederick Bergman, the well-known hotel keeper at South Beach, who figured prominently in the numerous "fence wars" at that place, was yesterday sentenced to six months in the Kings County Penitentiary for larceny. Bergmann was convicted of rifling a trunk which had been left at his hotel. On Friday when the jury connected him he ran out of the court and attempted to escape, but was captured about a mile away from the jail. His wife and his mother-in-law, Mrs. Sarah Burke, who were also convicted on the same charge, were each fined \$200. In default of payment, they were committed to the County Iail.

ALONG THE SOUND.

BRIDGEPORT .- Dr. I. De Ver Warner, who gave 830,000 to the Young Men's Christian Association in Bridgeport, gave a reception on Friday evening at his home to people interested in Y. M. C. A. affairs. Among those present were General O. O. Howard, H. B. Chamberlain, president of the Defiver (Col.) Board of Trade, who gave \$50,000 to the association in his city, and Colonel Thomas Cochrane, of St. Paul, Minn. General Howard made an address. Dr. Warner said the building in Bridgeport, whose cornerstone was laid by Chauncey M. Depew last summer, would be finished in October, 1891.

ARRESTED FOR ROBBING A BANK.

Frank F. Vreeland was arrested in Brooklyn last night on suspicion of being the man who stole \$5,000 from the Twenty-sixth Ward Bank in that city a few days ago. One of the clerks in the bank thinks that

Cornes and Carriages.

STUDEBAKER BROS. MFG. CO.,

the prisoner is the man who entered the bank to say that a man in a wagon outside wished to deposit some money and thus got the bookkeeper to leave the building. Vrecland was sent to State prison for the building. Vreeland was sent to State prison lob burglary in 1884, and was released last May. The Brooklyn police say that he is the man who led In-spector Byrnes on a wild goose chase into New-Jersey in the attempt to recover the body of A. T. Stewart. Vreeland was held for examination.

PLANS OF KINGS COUNTY REPUBLICANS.

WORK OF THE COMMITTEE OF THIRTY AP-

POINTED TO CONSIDER REORGANIZATION. A meeting of the Kings County Republican Com mittee of Thirty, to consider the reorganization of the party, was held last evening at Republican Headquarters, No. 153 Lawrencest., Brooklyn. Among the members of the committee present were Major E. H. Hobbs, A. N. Lewis, D. A. Baldwin, Lester W. Beasley, Jacob Brenner, Dr. Hepp, H. J. Martense and Hug Hirsh. Mr. Hirsh was chosen to preside in place of R. D. Benedict, who was absent. Among those invited to advise with the committee there were present Francis H. Wilson and Benjamin Estes, of the Union Francis H. Wilson and Benjamin Estes, of the Chief League Club; Charles A. Moore, William H. Williams and D. G. Harriman, of the Young Republican Club. Timothy Perry, ex-Senator S. M. Griswold, George F. Elliott, Clarence A. Barrow, William Berri, Colonel Henry E. Rochr, George Kenneth, W. J. Taylor, Jesse Johnson, C. H. Colton and Thomas A. McWhinney. It was decided by a vote of 13 to 5 to have the

meeting in executive session, and to have a free expression of opinion regarding the best measures adopt. Plans were presented by Major E. H. Hobbs. Clarence A. Barrow, George H. Mason and others. All provided for substituting a new General Committee for the present body, but they differed in regard to Major Hobbs's plan provided for the end of

terms of office of the present General Committee on December 31, and ubstitution of a committee composed of one delegate at large from each ward and town and one member for each 400 Republican votes cast at the last preceding election for Governor, one half to be elected every year. Reenrolment of Republicans in each ward and town was provided for and the printing of the roll-books. Revision committees and district captains were also provided for by the pian, and nominations at primaries instead of by conventions.

Speeches were made by William H. Williams. Benjamin Estes, S. M. Griswold, E. H. Hobbs, George H. Nason, D. G. Harriman, F. H. Wilson and others, and the proceedings were continued until a late hour. The committee will meet again next Saturday, for further consideration of the subject.

THE CITY VISITED BY A GALD.

New-York was treated to a severe windstorm yes terday. Happily, however, the fury of the western breeze was short lived. The visitation was due to the area of high barometer pressure following on a storm from the northwest now going off the Canadian coast. At midnight on Friday the wind was blowing at fifteen miles an hour, and from then until 8 o'clock yesterday morning it gradually fell to seven miles an hour. Then at 9 o'clock, without the slightest warnhour. Then at 9 o'clock, without the signess with lng, the gale swooped down upon the city, and between 9 and 9:30 a. m. it had increased from ten to thirty miles an hour. During the next hour and a half it increased in fury until at 11 o'clock it had half it increased in fury until at 11 october it had reached a velocity of forty-two miles an hour. This rate of progress was maintained for only a few minutes. At noon its force had abated to thirty miles an hour, and gradually decreased until at 8 p. m. it had fallen to seven miles an hour from the southwest. The velocity in New-York was the highest recorded anywhere along the Atlantic coast.

THE WALRUS ALMOST EXTINCT. Washington letter in The Philadelphia Inquirer. As to that enormous but comparatively helpless beast the walrus, its doom is likewise scaled. Before the weapons of those who pursue it to get its hide for boats and leather, its tusks for ivory, and its whiskers for opium pipe picks, it is quickly disappearing. The method adopted by the hunters is to approach a group

of walruses on the ice, and, after picking off the more alert bulls from a safe distance with rifles, slaughter the herd at leisure. It was in somewhat the same way that the great Arctic sea-cow, now long extinct, was utterly annihilated.

CITY ELECTIONS AT PROVIDENCE.

REPUBLICANS CONFIDENT OF SUCCESS-HENRY M. STANLEY'S LECTURE.

Providence, R. I., Nov. 22 (Special).—The municipal election occurs next Tuesday, and the present outlook is extremely favorable to Republican success. The Democratic candidate, Mr. McNally, does not command the confidence of his own party. The revolt is so serious that it includes a large proportion of Demo-cratic leaders. Included among these are Augustas S. Miller, Speaker of the House of Representatives; John M. Brennan, leader of the Democratic side in that body; Charles Wilson, chairman of the Democratic City Committee; Albert Sanford and Thomas Mc-Murrough, members of the Democratic City Committee; Hiram Howard, last year the Democratic candidate for Mayor; Noah J. Arnold, an old line Democrat, of Providence; John M. O'Rourke, a political worker in the Fourth Ward, and many others, to say nothing of the hundreds who will follow the lead of these gentlemen. The Republicans are united in the sup-port of the Republican and Citizens' candidate, Charles Sydney Smith. Mr. Smith has been a growing candidate from the first day of his nomination, and he gains votes every day. His record is so open and clean that all attempts to injure him are of no avail. His ability no man questions, and his reputation for uprightness in both public and private life is universal. The only attempt to attack him has been along the lines of opposition to the interests of labor. A feeble effort is being made to show that on the matter of the ten-hour law, the establishing of a bureau of industrial statistics and the Weekly Payment bill, his votes in the State Legislature were against the in-terests of laboring men. The facts are these: When the ten-hour law was agitated and passed Mr. Smith was not in the Legislature. In his own large factory the men work fifty-nine hours a week and get sixty hours' pay. This has been the custom for years. Mr. Smith when Senator did become convinced that the Eureau of Industrial Statistics was paying a commissioner a good salary without his doing much service. Since the Secretary of State and Commissioner of Public Schools furnished the greater part of the information, and the clerk did all the work, he introduced a bill to make the Secretary and Commissioner also Commissioners of Industrial Statistics at \$500 a year each in addition to their customary salaries. He simply desired to abolish a sinecure. It is now generally admitted that he was correct. The Weekly Payment bill never reached the Senate when Mr. Smith was a member, so he could not have opposed it. In his own factory not only does every employe get his pay Saturday night, but he can draw money any time during the week. Mr. smith says: "The best answer I can give to these labor attacks is to extend an invitation to anybody interested to come to my factory and interview my hands. The majority of them have worked for me ever since I have been in business."

The Republicans are fully organized and wideawake. and the full vote will be got out. Unless all pre-elec-tion signs fall, Charles Sydney Smith will be the next

Mayor of Providence.

There are a few Aldermanic fights on the docket, In the First Ward Alderman Dyer has the indorsement of both parties. In the Second Ward Alderman Doug-las is all right. In the Third McGuinness will be returned, as well as Winship in the Fourth and Burroughs in the Fifth. In the Sixth the Republicans have nominated Myron W. Fuller, an independent Democrat, against John Carr, regular Democrat. In the Seventh Councilman Deming will have a walkover for Alder-In the Eighth Councilman Harris will become an Alderman without much effort. There is a hot an Aderman without made and pennis is opposed by Attorney General Slocum. The latter is popular and the ward is close. But Slocum seems to be luke-warm in support of McNally, and there will be some scratching on that account. It is an uncertain fight, and slocum's chances seem a trifle the best, but Dennis is making a brave fight. There came near being a lively

war in the Tenta between two Democrats. Ex-Consul Monaghan desired to be Alderman, but ex-Alderman West beat him in the caucus. Monaghan arranged a bolt, but was called off for fear that he would injure the chances of his friend McNaily for the Mayoratty, the chances of his friend McNaily for the Mayoratty, the chances of his friend McNaily for the Mayoratty, the chances of his friend McNaily for the Mayoratty, the chances of his friend McNaily for the Mayoratty, the chances of his friend McNaily for the Mayoratty, the cardena of the carden

FOREIGN NAVAL NOTES.

The foundering of the British gunboat Serpent in a violent storm off the Spanish coast on the night of November 12, while one of the most lamentable disasters that ever occurred with any naval vessel, may be said to have been what many an English Navy officer had predicted "would be." They had criticised all of the Serpent class of boats, and more than cised all of the Serpent class of boats, and more than one of them had "displayed a tendency to shake herself to pieces" when caught in even moderate weather. The trouble seems to have been that the weight of mate sais of construction has been sacrificed for the element of speed. In other words to provide for the increased answer to provide for the increased. creased amount of machinery required to get the ex-treme speed the weights, and consequently the strength of plating and angles and braces, were no doubt modified so that the displacement of the vessel affoat would not be increased. The Serpent certainly went to the bottom so suddenly that it proves that she was not only unseaworthy; but was structurally at fault.

"Looking at the many recorded failures which have occurred in the vain attempt to drive our short and overweighted cruisers at high speed, and at the great waste of money and time occasioned by such constant breakdowns, I feel that it would be wrong not to persevere in the endeavor to secure those improvements which are needed to place our Navy upon a safer basis," said a British admiral recently. He and others have declared that far too much of the hundred millions of dollars appropriated for new ships was spent upon or donars appropriate to weakly built: that instead of this money being laid out upon strong warships vessels have been built "which, as in the case of the Barhams, Spankers, Edgars, Scrpents, etc., proved too weak."

The British Admiralty have certainly had occasion to stop to consider what other maritime nations are doing in the matter of new vessels. And in some instances it has led them to make some changes. For instance, the Russian cruiser Admiral Kerniloff showed to such advantage in the Pacific that the Admiralty at once ordered the rig and armament of the Warspite and Imperieuse to be changed. But neither of these and Imperieuse to be enanged. But neither of these large cruisers can be made to attain the speed and small coal consumption of the Kerniloff. The Rurik, a still more powerful Russian ship, has the length which it is admitted would much improve the English cruisers and battle-ships, about which there has been so much criticism as being too weak in the bows to use their rams safely." The French ships are also admitted to be much su-

projectiles from exploding in the bow and cause a dangerous tilting of the stern out of water, ha simply followed the idea that was carried out in the British warship Dreadnought and in one or two oth

The new plans for a new first-class ironclad for the Prench Navy have just been prepared and been approved by the Fench Admiralty. The vessel is to be built at the La Seyne Works. She will be 354 feet long, and will be built with triple screws, the same as the American commerce-destroyer which is to be built at San Francisco. Commodore Melville, Chief of the Bureau of Steam Engineering, designed the engines and machinery of the latter. The French vessel will be practically a high-speed naval fort, with a large central battery, at each of the four corners of which will be a turret. In each of these turrets will be mounted two 5 1-2-inch guns. There will be two 12-inch guns in the axis of the ship with a fore and at fife, and on the sides at a somewhat lower level will be two 10 1-2-inch guns. There will also be a number of machine and quick-firing guns mounted on deck and in the tops. ong, and will be built with triple screws, the same as

The French Admiralty have also ordered submarine torpedo boat much larger than the Gymnots. She will be of 250 tons, 130 feet in length, and the speed will be fourteen knots an hour. The new b will be fitted with a torpedo tube and will be nan La sirene. Her keel will be said down at Toul The repeated trials of the Gymnote have proved ast ishingly successful.

Pandora appears to have been precisely the same as that which occurred at the trial of the Barracouta few months ago, when a dozen or more men were badly burned, some of them fatally, through the crimina folly of forcing boilers and engines to the breakdown point in order to get results which are never subsequently attained, and could not be attained in regular service. The fact is that the use of the system of forced draft on the British ships results in the overheating of the tube-plates, the tubes and tube-plates expand at different degrees, leakage follows, and then all at once there is a sudden increased pressure in the combustion chamber, and the fire is forced out of the ash-pit, burning the unlucky firemen.

Another recent breakdown occurred during the stea trials of the gunboat Sharpshooter. The deranger was caused by the bending of the piston-rod. vessel has been on the contractor's hands for a great many months, and all her trials have been the most dismal failures, and it is not possible to develop even. The greatly reduced horse-power that the Admiralty have agreed to accept. This vessel is of the Gossamer class, and there are eighteen of them built or building.

A new battle-ship, to be called the Hood, has just een started at the Chatham Dock-Yard for the British Navy. She is designed to have a displacement of 14,150 tons, and 13,000 horse-power. She is estimated to have a speed of twenty knots an hour. She will be of the improved Admiral class, while her tonnage is to be nearly 4,000 tons in excess of other vessels of that type of battle-ships. She will cost, exclusive of the cost of her armament, about \$3,000,000. The Italian Government propose to spend about

\$15,000,000 toward the new Navy during the current fiscal year. It would seem that Italy has concluded best to make sure of her naval position in the Mediter The German Government has just given orders for

the building of two first-class gunboats, and they are to be built by a shipbuilding firm that has never be-fore received an order from the German Admiralty. The new vessels are to be armed with two Krups breech-loaders of the heaviest calibre.

WITH LIABILITIES OF ONE MILLION DOLLARS, Chicago, Nov. 22.-An assignment was made to the County Court by W. L. Prettyman, banker, to the

cashler of his bank, Charles H. Johnson. At the same time Johnson was made assignee of the North Division Lumber Company, one of the largest lumber firms in The Prench ships are also admitted to be much superior to the English cruisers in this respect, they being stengthened by carrying the plating round their bows. This impovement was recently made on the fast French cruiser Bruix, and on other vessels of her class. The French in thus strengthening their ships, both for the
